BEHAVIORAL INVESTMENT MANAGEMENT

Passive Solutions:

Asset allocation is an investment approach that aims to balance risk by dividing assets among major categories such as cash, bonds, and stocks. The risk-return trade-off lies at the core of this approach.

Active Solutions:

Our actively managed strategies seek long-term growth of capital. These are designed to remain fully invested throughout the economic cycle and weather market volatility, with the goal of generating alpha through stock selection.

Tactical Solutions:

Our smart **tactical™** Strategies enable your overall portfolio to be more adaptive to changing market environments. These strategies have the ability to invest in any exchange traded asset class and are not restricted by market cap, sector, or geographic location. They may also hold a substantial fixed income or cash position based upon our **macrocast™** or **microcast™** indicators.

macrocast™		microcast™	
V	Valuation	T	Technical Analysis
I	Inflation	U	Underlying Market Breadth
T	Technical Analysis	M	Momentum
A	Aggregate Economy	S	Sentiment
L	Liquidity		
S	Sentiment		

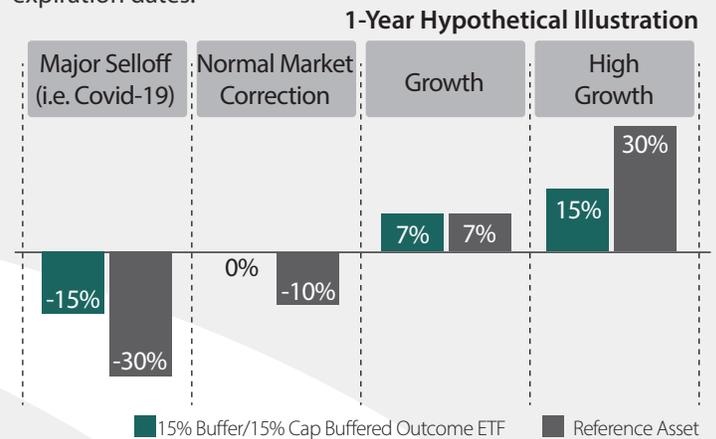

Hybrid Solutions: Helix Series

The **Helix Series** seeks to capture the risk reduction benefits of tactical management in a tax-efficient manner. The solution delivers the active adventures of tactical exposure, paired with the diversification benefits of asset allocation, all within the tax-efficient structures of an ETF.

Hybrid Solutions: Buffered Outcome Strategies

These provide a solution to investors that find experiencing losses to be more difficult than missing out on potential gains. They are designed to enable investors to participate in the growth potential of equity markets up to a stated cap, with a specific downside buffer. Buffered ETFs are constructed with an actively managed basket of FLEX Options that allow for customized strike prices, underlying reference assets, and expiration dates.
